RIBSTONE AREA
LEASE TAKEN
4 FOR DRILLING

Gordon Beattie Heads Company
Which Has Secured
15,000 Acres

Having secured a 15,000 acre block in the Ribstone district, as reported on Wednesday, two wells will be drilled on specially selected locations with two months, states Gordon Beatties, well known oil man who with associates organized and drilled the first two wells at Wainwright for the British Petroleum company.

The leases are southwest of Ribstone on the broad regional anticline as defined by Dr. Hume in his report to the Dominion government. The drilling depths to the oil sands will be from 1650 to 1700 feet and rotary drilling equipment will be shipped in shortly to start operations.

Dr. Warren, geologist of the University of Alberta, and William Cox, geologist and who is a graduate of McGill university and taken post graduate work at the Massachusetts School of Technology have reported favorably on this acreage and selected the drilling sites.

There is to be no stock put on the market to drill the first well as the financing is to be done by the Ribstone Petroleum syndicate, headed by Mr. Beattie. As the wells will be higher on the superstructure and the regional anticline, it is expected that oil production will be greater and of higher grade than heretofore.

CHAUVIN BOARD OF TRADE GOING STRONG

The next meeting will be held on Tuesday June 8th, at 8 p.m. Don't forget the date.

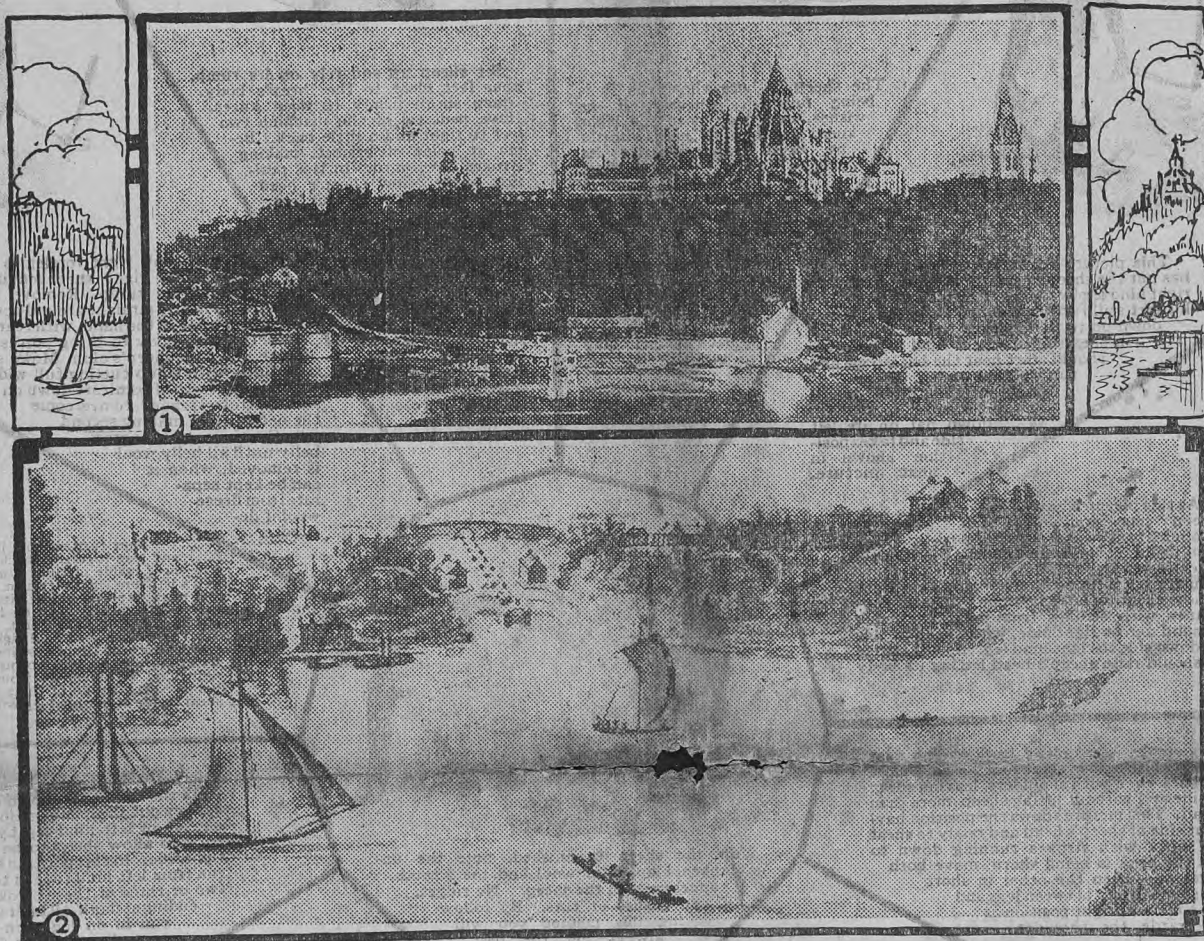

If you are interested in this work come to this meeting.

Remember this is a district Board of Trade and farmers and townsmen are alike requested to join.

Members are now as follows:

G. W. Allan,
E. W. Atkins
L. Borregard.
W. J. Cubitt
A. Croteau
I. E. Collette

Choice of Dominion Capital To Be Celebrated

1. Entrance to Rideau Canal to Ottawa River before fire destroyed Parliament Buildings. 2. Old entrance to Rideau Canal—Parliament Hill, as it looked 100 years ago, at right—from painting by Clegg at time of opening of Canal, 1826.

In the late summer of 1826 Lieutenant-Colonel John By, of the Royal Engineers, selected the spot where the Rideau Canal should enter the Ottawa River, and in so doing settled the site of what afterwards became the capital of the Dominion of Canada. The centenary of this event is being marked this coming August by a celebration which is expected to be national in character. The Dominion Government has already intimated its intention, not only of taking part, but of signaling the occasion by extension of its works for the beautification of the capital. The celebration itself will include historical pageantry and will draw from the western plains a spectacular "Stampede" as illustrative of one of the historical phases of the development of that broad section of the Dominion.

In making his journey up the Ottawa, Colonel By was not planning for the capital of a Dominion but striving to strengthen the defences of one of the outworks of the British Empire. "During the war of 1812-15," says Hamnett P. Hill, in a brief history of the construction of

the Rideau Canal, "the British authorities experienced much difficulty in attempting the defence of the western part of the province. This was owing to the difficulties of transporting men and supplies from Montreal to Kingston, because of the rapids on the St. Lawrence River. They were also faced with the danger of a U. S. army blocking progress up the river by seizing some of the islands near Kingston. The cost of transport from Montreal to Kingston was also excessive, being fifty-four shillings per cwt.

This was the problem which Col. By came out to Canada to solve. He had spent nine years in this country after 1802, when he had been entrusted with the construction of the Martello towers at Quebec and the rebuilding of the Citadel, and he had also superintended the construction of the Cedars Canal near Montreal. The task of building the canal to connect the St. Lawrence and the Ottawa Rivers, 126 miles in length, through uninhabited country, was gigantic at that stage of the development of the country, and its successful completion stamps its builder as an engineer of high rank.

The coming of railways has superseded it and rendered it practically useless as a carrier of traffic; but it rendered valuable service in earlier days for the settlement of the Province of Ontario, both east and west. Three years after Bytown became Ottawa, it was chosen as the capital of the old Province of Canada.

The centenary celebration this summer will last two weeks, from August 16 to 28. The first week—August 16 to 21—will be devoted particularly to the centenary program, which will include an historical pageant illustrating outstanding periods and events in the history of the capital. During the same period the Edmonton Stampede will give a daily program; while arrangements are also being made for holding the Rudder International Power Boat races for two days of that week. Plans are not fully completed for the celebration, but among other proposals under consideration are the erection of a monument to Colonel By. The Dominion Government is also preparing plans for the extension of the Driveway which is such an attractive feature of the city.

INTERESTING ITEMS

A free barn dance will be held in the new barn at T. Smiths' farm, Butze, on June 11th. Everybody come and fetch your musical instruments.

The regular monthly meeting of the Chauvin Board of Trade will be held at Keith's office on Tuesday next, 8th. All members please make an effort to be present.

THREE CORNERED FIGHT IN NEARLY EVERY RIDING SURE

With the provincial general election polling day but a month away, all three political parties are hot in the fray and three-cornered fights are being staged in practically every riding.

Premier Brownlee has made an early entry into the arena and is fully cognizant of the uncertainty of the results in many ridings. he has already no less than 100 speaking dates arranged.

MENTION OUR ADVERTISEMENTS

J. R. LOVE, M.L.A. TO SPEAK IN THIS DISTRICT

Mr. J. R. Love, M.L.A., in the last Provincial Legislature will speak at a series of meetings as follows:

Airlie, Monday June 7th at 3 p.m.
Prosperity, Monday June 7th at 8 p.m.
Rosos, Tuesday June 8th at 8 p.m.
As Butze residents are largely within the boundaries of Airlie poll as many as are able are requested to attend the Airlie meeting. The time is short and a lot of ground has to be covered before June 28th.

The following composite illustration of the correct method of shearing sheep should be of considerable interest to farmers who keep sheep or who intend to do so. For the convenience of any who wish this illustration in permanent form we will, on the receipt of 5c in stamps send a copy printed on cardboard to the required address.

THIS IS THE PROPER WAY TO SHEAR A SHEEP

The pictures, with printed instructions illustrate and describe briefly a system of shearing sheep that has been developed by the thousands of professional shearers of America and Australia.

Read Clockwise

While slight modifications in the directing of the strokes taken with the shear are made by different shearers, the beginner should follow the instructions as closely as possible.

NEWS BUREAU OF ANIMAL HUSBANDRY

"The Covered Wagon"

(Continued from last week)

It was a rolling carpet of brown like the prairie's endless wave of green. Dust clouds of combat rose here and there. A low muttering rumble of hoarse dull bellowing came audible even at that distance. The spectacle was to the novice not only thrilling—it was

terrifying.

The general movement of the great pack was toward the valley; closer to them a smaller body of some hundreds that stood, stupidly staring, not yet getting the wind of their assailants.

Suddenly rose the high-pitched yell of the scout sounding the charge. Snorting, swerving, the horses of the others followed his, terror smitten but driven in by men most of whom at least knew how to ride.

Smoothly as a bird in flight, Bridger's trained buffalo horse closed the gap between him and a plunging bunch of the buffalo. The white savage proved himself peer of any savage of the world. His teeth bare as he threw his body in to the blow with a short

savage jab of the left arm as he loosed the sinew cord. One after another arrow showed clinging to heaving flank, one after another muzzle dripped red with the white foam of running; then one after another great animal began to slow; to stand braced, legs apart; soon to begin slowly kneeling down. The living swept ahead, the dying lay in the wake.

The insatiate killer clung on, riding deep into the surging sea of rolling humps. At times, in savage sureness and cruelty, he did

not ride abreast and drive the arrow into the lungs, but shot from the rear, quartering, into the thin hide back of the ribs, so that the shaft ranged forward into the intestines of the victim. It did not bury, but hung free as the animal kicked at it convulsively, he rode up, and with his hand pushed the shaft deeper, feeling for the life, as the Indians called it, with short jabs of the imbedded missile. Master of an old trade he was, and stimulated

-- Of Interest To Farmers --

CULTURES FOR SEED AND SOIL INOCULATION

In view of the fact that different cultures are offered for sale, some with sweeping claims, it is not surprising that farmers and growers are often at a loss to know how far success may reasonably be expected from these cultures, and just to what extent the use of these cultures is endorsed by present day science.

In all agricultural soils bacteria are necessary for the best production of any crop. They play an indispensable part in the preparations of plant food, helping it to change from an unavailable form into soluble form capable of being used by the growing plant. It is especially in connection with the work of supplying the nitrogen requirements of the plant that bacteria are important. While certain kinds convert nitrogenous materials in the soil itself into forms which can be taken up to the plant, others are

able to enrich the soil and the plant by gathering nitrogen from the air which consists of 80 per cent. of this element. Some of these bacteria work independently in the soil, others in association with plants, in the nodules or swellings seen on the roots of healthy plants.

With the single exception of the legume bacteria, there is no indication of a scarcity of bacteria in an otherwise good soil. If a soil is deficient in bacteria; then the soil does not favor their growth due to some defect. Only when such defect is corrected will the useful bacteria flourish, so that adding other bacteria than the legume bacteria will be superfluous in normal soils and of little or no avail in abnormal soils.

In the case of legume bacteria there may be an actual deficiency of these in a soil which may be remedied by inoculation. With each kind of legume are associated its own special bacteria, the presence of which is necessary in the soil if the plant is to benefit

from the supply of nitrogen in the air which the bacteria make available, and only in a limited number of cases will bacteria associated with a particular legume be of use to another. If a legume crop has been grown successfully in a short rotation, it may be assumed that the nodule bacteria of the right kind are in the soil. When, however, a particular legume is being grown for the first time, or after a long lapse of years, it has not grown successfully with previous attempts, it often will be a distinct advantage to add bacteria, or in other words, to inoculate. Even in such cases inoculation is not a sure remedy, for success will be most probable of other soil conditions are at their best. Legume inoculation is therefore an aid to, not a substitute for, good farming methods.

So far it is only in the case of legume cultures that the practice of seed or soil inoculation has received approval from agricultural scientists.

Up to the present, cultures claiming to be of benefit for all types of crops—grasses, root crops, flowers etc. as well as legumes, have not been proven to be of practical use.

Legume inoculation, however, is to be encouraged. Bacteria may be added to the soil by taking soil from a field where the same crop has grown successfully and incorporating it with the new land at the rate of 200 pounds to the acre. Such practice is often expensive, and is also subject to the danger of introducing weeds, insects and plant diseases. A simple method is that of adding a culture of legume bacteria directly to the seed before sowing. This is the method most commonly used and recommended.

Some of the provincial Agricultural colleges supply farmers with cultures at a small charge. Genuine nitro-cultures are also prepared and sold by various commercial houses. In addition, the division of Bacteriology, Central Experimental Farm, will supply free, to any farmer wishing to give seed inoculation, a trial culture sufficient for 60 pounds of seed. Cultures are sent out with the understanding that the applicant agrees to report results, and are not sold, the amount supplied to any applicant being limited to the quantity specified above. When application is made the approximate date of seeding should be given.

A. G. LOCHHEAD,
Dominion Bacteriologist

HYGIENIC SOIL CONDITIONS ESSENTIAL IN POULTRY RAISING

Hygiene in poultry raising not only includes consideration of the various needs of the chick, such as food elements light, heat, etc. but must at the same time consider the elimination of those things of an undesirable nature which would be likely to adversely influence the subject's well being. The latter are as varied as the former.

Probably the most detrimental factor (other than directly communicable diseases of which this article does not treat), the most poorly understood and the least combated in the rearing of poultry is that of soil pollution. The

evil effects may extend through the life-time of the stock resulting in increased mortality, lower production, and a reduction of the normal vitality with a greater susceptibility to contagious disease. This occurs as a result of keeping poultry continuously in the same yards and is very conducive to the development of worm disease.

Internal parasitism—the presence of parasitic worms in the intestines of fowl—is mainly dependent for propagation upon polluted soil. Land upon which young poultry are to be reared should not have had poultry on it for at least one year, nor should the soil have been fertilized with fowl manure. It should be planted in a grain crop of some sort in the between the periods used for rearing fowl. Under general farm conditions, when the adult stock have intestinal worms, and the land surrounding the farm buildings has consequently become polluted it is best to brood chicks indoors and raise them on land entirely separated from the existing flock.

THE ROSE CHAFER

Now is the time that diseases of plants have to be particularly considered and precautions taken against both their inroads and those of insects. Consequently Circular No. 44 dealing with the

Rose Chafer, published by the Entomological Branch of the Dominion Department of Agriculture is especially welcome. The Rose Chafer, say Messrs W. A. Ross and W. A. Hall of the Vineland laboratory, authors of the circular feeds in the blossoms, fruit and leaves of a great number of plants in fact is almost omnivorous. In many sections of southern Ontario it is known as the rose bug. Fortunately it breeds only in light sandy soil and for that reason its depredations are confined to sandy districts. A list of some thirty-five or forty plants, the blossoms

SALT FOR FARM ANIMALS.

(Experimental Farms Note)

Experience and science alike have shown that salt is essential to the good health and thrift of farm live stock. It is not for food, nor does it directly increase the digestibility of food but it nevertheless plays an important part in the work of nutrition. Very briefly its chief functions in the animal economy are: as a stimulant and tonic, when taken in small amounts; as a source of hy-

drochloric acid, a normal constituent of gastric juice. Its use therefore leads to a larger consumption of food, and further, by stimulating digestion, permits the animal to make a larger and more profitable return in flesh or milk production.

Of all farm animals, cows in milk require the largest amount of salt. It may be given at regular intervals or mixed with the meal at the rate of half-pound to 100 pounds of concentrates - or the cows may be allowed free access to it as rock or block salt in

the manger. One ounce per head per day, if used as barrel salt, will meet the requirements of the animal satisfactorily. It is only when the supply is irregular that fear need be entertained of the animal taking more salt than necessary or consuming too much resulting in securing.

Sheep require salt and there should be no neglect in supplying it either by trough, barrel salt, or by rock salt. It should be available to them at all times.

Horses thrive best when regularly supplied with salt, say about 1 ounce daily. When hard at work they require more than at rest for the reason that salt is excreted in the perspiration.

Pigs and poultry require less salt than other farm animals but it should be supplied regularly. Brood sows should not be without salt and this should be given in a box, trough or self feeder.

All stock fed liberally with rich nutritious feed exhibit a craving for salt and this should be met if health and thrift are to be maintained.

Bathing suits for men, women and children at Saker's.

DIX RACING DRIVER IN LATEST PICTURE

"The Lucky Devil" a Punchy Automobile Story, which will be shown at Chauvin next Monday and Edgerton next Tuesday. One of the latest Paramount pictures directed for the screen by Frank Tuttle. Esther Ralston is Dix's leading woman.

Dix, as Randy Farman, who demonstrates auto camping outfits in a store wins at a charity bazaar a specially roadster, around which has revolved a sensational break off promise suit between the wealthy Rudolphe Franklyne, and a notorious show girl, Zola Amber.

Then follows a series of laugh scenes when Randy starts out on his long dreamed of cross country trip. At a tourist camp he meets and falls in love with Doris McDee (Miss Ralston), journeying with her mother in a battered flivver. The mother, suspicious of young men who travel in ten thousand dollar roadsters, identifies Randy's beloved car as the one in the famous Franklyne-

Amber case, and takes her daughter and departs leaving a broken hearted Randy to pursue in a frantic effort to overtake the girl and explain everything.

From here on the laughs and thrills build up to unbelievable heights, the scenes including a bout between the star and "Gunboat" Smith (himself) and winding up with an automobile road race that'll pull you out of your seat.

Other big names in the cast of the picture, which is absolutely the greatest Dix picture yet made include Edna May Oliver, An-played in "the Little French thony Jowitt, new "find" who Girl"; Joe Burke, Mary Foy and Charles Sellon.

Saker's have the finest range of kiddies shoes imaginable. Strong, sturdy shoes in a wide range of styles. Absolutely all newly arrived stock.

C.N.R.ys TO OPERATE SPECIAL
TRAINS FROM WESTERN
CANADA

Of unusual importance to Roman Catholics is the 28th International Eucharistic Congress in Chicago, Ill., June 20th to 24th next.

The Church dignitaries are duly appreciative of the efforts made by the Canadian National Railways, who have arranged to operate special trains to and from the Congress, and have also made reservations for several hundred people in good hotels at a reasonable expense, and ask thier people to make application promptly for the necessary sleeping car and hotel accommodation. The Church authorities were consulted prior to arranging the train service so that the proper departure time from the various centres would be ensured.

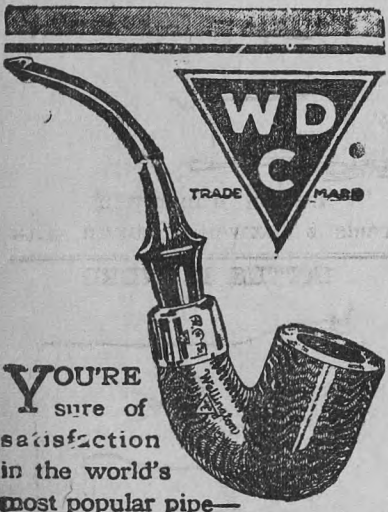

Those who desire to use the regular service have the privilege of travelling on the through train which is operated during the summer season from Western Canada to Chicago.

Any agent of the Canadian National Railways will be pleased to give you further particulars and complete all arrangements.

Women are said to be more generous in tipping the barber than are men. In one big hotel, the hairdresser frequently receives tips of \$2.50 from his lady clients

Now that seeding is over you will have more time for reading; you can't read if your eyes bother you and your eyes do bother you if you are over forty, but sometimes before that age is reached. Consult C. C. McKechnie Graduate Optician.

The newspaper cost's only \$2.00 per year. By using Saker's add. to advantage every house keeper can save ten times that much several times a year (It's on the back page).

Races, Tug-of-War, Horse Shoe, Basket Ball, Base Ball and sports of all kinds, good bathing Come and have the time of your life, on July 2nd.

ITEMS OF INTEREST
(Continued from front page)

Edgerton Chautauqua dates are June, 5, 7, 8. & 9.

Edgerton Sports day will be held on July 16th. Horse racing will include Horse Racing Baseball, Basketball, Athletic Events and Etc.

A dance will be given by the Ribstone Basketball Boys Thursday, June 3rd. Lots of fun for Everyone.

Messrs. W. J. Cubitt and E. A. Pitman made a week-end visit to Edmonton.

Crops in all sections of the district are looking well, though quicker growth would be made if the weather was warmer.

A meeting of the village council was held Tuesday evening.

For better returns leave your cream at Saker's.

DATE SET FOR PROVINCIAL ELECTION

Dissolution of the Legislature of Alberta was effected this week and writs issued for a provincial election on June 28th, with nomination day on June 18th. There are 60 seats in the Legislature.

SUGAR BEET ARCAGE

Acreage in sugar beets in the the irrigated districts of southern Alberta will reach 1,00 this season. This is 1,000 acres more than eht contracted area of last season.

STRANGE IDEAS OF SUNNY ALBERTA

Report of Arrival of Immigrants "Loaded for Bear"

The following is an extract from the Edmonton Journal of a recent date.

"Believing that bears might be seen climbing amid the cross-trees of Edmonton telephone poles at any time of the day while wolves lurked in every lane to waylay the unsuspecting passer by, five immigrants arrived at this city from Germany equipped with seven rifles of an expensive and ultra-modern German make, and provided with three barrels each for shot as well as bullets. Other baggage included seven cases of traps for bear, otter and divers other "wild beasts of fie": nd forest.

Asked by local immigration agent as to the reason for their big supply of armament the intrepid hunters replied that, fired by the hair-raising novels of Max Otto a former resident of Bruderheim, who has made a name for himself in German literary circles by his "Wilderness of Canada," they had come to see for themselves.

FARM LANDS IN DEMAND

With farm land values just at the upturn and conditions improving, this season has brought a revival of buying of farm lands e-vival to that of 1918, said F. H. Henman, president of the Winnipeg Real Estate Exchange, re-

cently.

"One company alone has been averaging sales of 20,000 acres of farm lands a month since last October," Mr. Herman said. "In each case the land mostly wild land for pasturage and stock raising purposes, has been sold to bona fide farmers and not to speculators or investors. Substantial initial payments have been made and the buyers are meeting subsequent payments promptly. Th biggest demand for lands recently is in Saskatchewan and Southern Alberta.

An Experiment That Succeeded

Five years ago the people of Alberta, disgusted with the failure of Party Government to function to the advantage of the Province, defeated the candidates of the party machines, and experimented with a Government composed of men with no previous parliamentary experience, but actuated by a desire to serve the people's interests.

Five years have elapsed since that election. The Government formed then, goes back to the electors this month for their verdict

The party machines are doing their utmost to defeat the only business and non-party Government the Province has ever had. U.F.A. candidates are responsible to their constituents, not to Ottawa. They have no blessings from Mackenzie King or Meighen, no patronage to distribute, on promise to make but that of continued good government.

The members of the U.F.A. have subscribed funds and contracted for this space in the Chauvin Chronicle and in the limited time and space availabl from now till election day will endeavor to broadcast the facts. Further facts will be given at U.F.A. meetings to be held in your district, at which your attendance is invited.

LETTERS TO THE EDITOR

Dear Sir:-

I would like, on the behalf of the association, to extend a hearty invitation to all those who are critical of the farmer administration in Alberta as well as those who are sympathetic to come to Chauvin on Thursday, June 10th at 3 p.m. and hear farmer Premier Brownlee discuss the problems that are confronting us as a province.

I would especially like to have with us all our merchants and tradespeople of Chauvin, and I hereby make the request to the proprietors of different places of business to close their shops from three o'clock till four thirty. This will not only give you merchants a chance but will also help a great deal to have an undisturbed meeting.

From reading some of Mr. Brownlee's utterances I do not think he will bore you.

The meeting itself will draw a certain amount of business for the town on that date, and if each and every business man will take this request to heart and not watch to see what his competitor is doing no one will lose a dollars worth of business.

I would also like to have every one. Farmers, whether U.F.A. members or not, and all others within driving distance to make a special effort to come out on June 10th and hear Mr. Brownlee. Don't forget the hour—3 p.m. after the local eastbound train goes through.

Thanking you for your valuable space Mr. Editor.
CHARLES MILLER

HANDSHAKING IS HARD WORK

The decision to abandon the White House custom of indiscriminately shaking hands was bound to be made sooner or later, for it has become a menace to the health of both the president and his wife. At the first reception after the war President Harding shook 6,500 hands at the rate of 30 per minute. President Wilson wished he could get a glove with steel fingers. The wife of President Cleveland found her right hand getting much larger than her left as a result of much democratic salutation, and took violin lessons to reduce the disparity. Mrs. Harrison, after the first experience evaded the ordeal by holding a fan in one hand and a bouquet in the other. We remember how the Prince of Wales was similarly incapacitated during his visit to Canada by the too hearty grip of welcome.

HUGGING A GIRL NO WORSE THAN ... HONKING A HORN

Driving an auto with one arm while the other is around a maiden's waist is no worse than driving with one while sounding his horn, declared Chief Justice Gordon Hunter in the supreme court Thursday in quashing a conviction of Jerry Vink, a truck driver who was fined \$10. for diving to the common danger.

USE DRASTIC MEANS TO CURB SPEEDING

Nail Studded Poles Supplied To Police of Athens

Poles five feet long and studded with large nails are to be supplied to Athenian police, according to reports as a means of curbing recalcitrant chauffeurs who insist on driving their cars at excessive speeds. Any chauffeur who disobeys a police signal to slow down will henceforth expose his tires to the assaults of these formidable weapons. in the use of which the police are instructed to exercise the utmost freedom.

LESSER SLAVE LAKE FISHING IS GOOD

Seven carloads of fish, consisting mainly of pickerel, with a small percentage of whitefish, constituted the catch at Lesser Slave lake for first week of the season. R. T. Todd, local inspector of fisheries stated on Thursday. This catch compares very favorably with that of last year, when the season opened on the same date.

So far the catch at Lac la Biche this year has been light, it was stated, but that it was expected to pick up later in the season.

HAD NARROW ESCAPE

Coronation—Roy Daniels and Archie Donald narrowly escaped serious injury when the radius rod of their car suddenly hit the ground, with the result that the car turned completely upside down and faced in the opposite direction, with the two occupants of the car underneath. The boys somehow emerged from the mess and with help which they telephoned for, the old bus was turned right side up, a few twists straightened out, a turn if the old crank and away they went, comparatively happy.

You Tell 'Em Alberta.

A free barn dance will be held in the new barn at T. Smith's farm, Butze, on June 11th. Everybody come and fetch your musical instruments.

FIFTH ANNUAL TOUR TO THE PACIFIC COAST

Special Train Leaving Winnipeg July 5 via Canadian National Railways. Entertainment Provided at Various Points of Interest en Route.

PERSONALLY CONDUCTED

Following the close of school for the summer holidays, the Canadian National Railways will again operate its popular "personally conducted" tour to the Pacific coast. This will be the fifth of such tours.

This mode of travel has many advantages. In the first place, it is planned with a view to including in the itinerary the most interesting points, which, with the other arrangements that are made obviates the necessity of the passenger worrying about connections, sleeping car accommodation, meals, and entertainment en route. This is all done in advance by experts, leaving the passenger free to enjoy to the full the scenery and attractions attendant to such tours.

The tour this year will commence at Winnipeg from which point a special train of modern sleeping car equipment, dining car and radio observation car will leave July 5th. After stopping at various points of interest, the train will arrive at Prince Rupert on July 5th. At this latter point the party will embark on a palatial steamship for a cruise of 550 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver those who desire to make a trip to Victoria may have their tickets read "Victoria" as their destination without any additional cost.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour.

THE COVERED WAGON

(Continued from page 2)

by the proofs of his skill, his followers emulated him with their own weapons. The report of firearms, muffled by the rolling continuous so long as the horses could keep touch with the herd.

Bridger paused only when his arrows were out, and grumbled to himself that he had no more, so could count only a dozen fallen buffalo for his product. That others, wounded, carried off arrows, he called bad luck and bad shooting. When he trotted back on his reeking horse, his quiver dancing empty, he saw other black spots than his own on the short grass. His followers had picked up the art not so ill. There was meat in sight now, certainly—as well as half a dozen unhorsed riders and three or four wounded buffalos disosed to fight.

The old hunter showed his men how to butcher the buffalo, pulling them on their bellies, if they had not died thus, and splitting the hide down the back, to make a receptacle for the meat as it was dissected; showed them how to take out the tongue beneath the jaw, after slitting open the lower jaw. He besought them not to throw away the back fat, the hump, the boss ribs or the intestinal boudins; in short, he gave them their essential buffalo-hunting lessons. Then he tunred for camp, he himself having no relish for squaw's work, as he called it, and well assured the wagons would now have abundance.

Banion and Jackson, with their followers, held their hunt some miles below the scene of Bridger's chase, and had no greater difficulty in getting among the herds. "How're ye ridin,' Will?" asked Jackson before they mounted for the start from camp.

Banion slapped the black stallion on the neck.

"Not his first hunt!" said he.

"I don't mean yore hoss, but yore shootin' irons. Whar's yore guns?"

"I'll risk it with the revolvers," replied Banion, indicafing his holsters. "Not the first time for them, either."

"No? Well, maybe-so they'll

do; but fer me, I want a hunk o' lead. Fer approachin' a buffler, still-huntin', the rifle's good, fer ye got time an' kin hold close. Plenty o' our men'll hunt that way to-day, an' git meat; but fer me, give me a hunk o' lead. See here now, I got only a shotgun cap an' ball, fourteen guage she is, an' many a hide she's stretched. I kerry my bullets in my mouth an' don't use no patchin'—ye ain't got time, when ye're runnin' in the herd. I let go a charge o' powder out'n my horn close as I kin hit, spit in a bullet an' roll her home on top the powder with a jar o' the butt on top by saddle horn. That sots her down, an' she holds good enough to stay in till I ram te muzzle inter ha'r an' let go. She's the same as meat on the fire."

"Well," laughed Banion "you've another case of gustibus, I suppose."

"You're another, an' I call it back!" exclaimed the old man so truculently that his fried hastened to explain.

"Well, I speak Blackfoot, Crow, Banack, Grow Vaw, Snake and Ute," grumbled the old scout, "but I never ran acrost no Latins out here. I allowed maybe-so ye was allowin' I couldn't kill buffler with Ole Sal. That's what I keep her fer—jest buffler. I'll show ye afore long."

And even as Bridger had promised his favorite weapon, he did prove beyond cavail the efficiency of Old Sal. Time after time the roar or the double roar of his fusee was heard, audible even over the thunder of the hoofs; and quite usually the hunk of lead, driven into the heart or lights, low down, soon brought down the game stumbling in its stride. The old half-bred style of loading, too, was rapid enough to give Jackson as many Buffalo as Bridger's bow had claimed before his horse fell back and the dust cloud lessened in the distance.

The great speed and bottom of Banion's horse, as well as the beasts savage courage and hunting instinct, kept him in longer touch with the running game. Banion was in no haste. From the sound of firing he knew his men would have meat. Once in the

surge of the running herd, the rolling backs, low heads and lolling tongues, shaggy frontlets and gleaming eyes all about him, he dropped his reins on Pronto's neck and began his own work, carefully, riding close and holding low, always ready for the sudden swerve of the horse away from the shot to avoid the rush of the buffalo when struck. Since he took few chances his shot rarely failed. In a mile or so, using pains he had exhausted all but two shots, one in each weapon, and of course no man could load the old cap and ball revolver while in the middle of a buffalo run. Now out of sheer pride in his own skill with small arms, he resolved upon attempting a feat of which he once had heard but never had seen.

Jackson, at a considerable distance to the rear saw his leader riding at the back of two bulls which he had cut off and which were making frantic efforts to vertake the herd. After a time they drew close together, running parallel and at top speed. At a distance, what Jackson saw was a swift rush off the black horse between the two bulls. For an instant the three seemed to run neck and neck. Then the rider's arms extended, each on it's side. Two puffs of blue smoke stained the dust. The black horse sprang straight ahead, not swerving to either side. Two stumbling forms slowd, staggered and presently fell. Then the dust passed, and he saw the rided trot back, glancing here and there over the broad rolling plain at the work of himself and his men.

"I seed ye do hit, boy!" exclaimed the grizzled old hunter when they met. "I sed ye plain, an' ef I hadn't and ye'd sed ye'd did hit, I'd of said ye was a liar."

"Oh, the double?" Banion colored, not ill pleased at praise from Sir Hubert. praise indeed, "Well, I'd heard it could be done."

"Once is enough. Let 'em call ye a liar atted this! Ef ary one o' them bulls had hit ye ye'd have had no hoss; and ary one was due to hit ye, or drive ye against the other, an' then he would. That's a trap I hain't ridin inter noways, not me!"

He looked at is own battered

piece a trifle ruefully.

"Well, Ole Sal," said he, "'pears like you an' me ain't newfangled enough for these times, not none! When I git to Oregon, of I ever do, I'm a goin' to stay thar. Times back, five year ago, no one dreamed o' wagons, let alone plows. Fust thing they'll be makin' plows with wheels an' rifles that's six-shooters too!"

He laughed loud and long at his own conceit.

"Well, anyways," said he, "we've licked one red nation an' got enough meat for the white nation all in a couple o' days. Not so bad—not so bad."

And that night, in two separate encampments, the white nation, in bivouac, on it's battle ground, sat around the fires off 'bois de vaches' till near mornning, roasting boss ribs, breaking marrow-bones, laughing, singing, boasting, shaking high their weapons of war, men making love to their women—the Americans, most terrible and most successful of all savages in history.

But from one encampment two faces were missing until late, Banion and Jackson of the Missourians. Sam Wodhull, erst-while column captain of the great train, of late more properly to be called unattached, also was absent. It was supposed by their friends these men might be out late superintending the butchering, or that at worst they were be nighted far out and would find their way to camp next morning.

Neither of these guesses were correct. Any guess, to be correct must have included in one solution the missing of men from both encampments, who had hunted miles apart.

(To be Continued)

MENTION OUR ADVERTISEMENTS

THE ROSE CHAFER

(Continued from page 3)

of which it delights to feast on are given. The list includes fruit grasses, flowers, not trees end even vegetables. It contains a poison which affects the heart of small animals such as chickens.

As to control, the circular says that it has been ascertained that the plough, disc and cultivator are the most important weapons in fighting the roe chafer and that the best time for using them are, first, in late May and early June, or about the time the land should be prepared for corn or potatoes; second in mid-july when the land should be prepared for buckwheat and old strawberry patches should be plowed under, and, third, in late fall when plowing is commonly done.

It is a pest that requires community action to prevent its spreading. If spraying can be done without poisoning the fruit or spoiling the bloom it can be performed as soon as the beetles appear, with arsenate of lead powder) 3 pounds, cheap molasses, one gallon, and forty gallons of water. Spraying howerer, should be regarded as only a temporary expedient until the chafer can be brought under control by cultural methods.

PREMIER BROWNLEE TO SPEAK AT CHAUVIN

Premier Brownlee will speak in the I.O.O.F. Hall, Chauvin on June 10th at 3:00 o'clock in the afternoon in the support of the U.F.A. candidate in the coming election. All are welcome.

**CHAUVIN VILLAGE
COUNCIL MEETING**

The Village of Chauvin Council meeting was held at 8 o'clock p.m. Tuesday June 1st. 1926.

Clerks Present: A. Herbert, and A. E. Keith, Reeve presiding, D. W. Parcels arriving later.

Minutes of last meeting were read and adopted on motion of councillor A. Herbert.

Bills: Joe. Davignon, street 12.50
G. Goede 3.50

Moved Cdr A. Herbert that bills be passed as read. Carried.

Correspondence: Letter from superintendent of Dependent and Delinquent children Re, Change in the Mother's Allowance Act. The amendment was read. The

letter filed.

Mr. Foxwell asked the Council if June 3rd would be observed.

Council advised that June 3rd was not included in the By-Law as a Village Holiday.

Mr. Scott spoke to the Council that he thought that there should be something done re. reckless riding and driving in the streets of the Village of Chauvin.

Mr. Pelletier waited on the Council re. the letter written to him in connection with a separate entrance to the Ice Cream Parlor after closing the grocery store.

Mr. Scott spoke regarding early closing. He was in favour of closing at 6:30 p.m. most of the year that is except seeding and harvesting.

Mr. Poirier waited on the Council and asked if June 3rd would be observed as a public holiday. He was informed in the negative. Moved D. W. Parcels that the meeting adjourn till July 13th. Seconded by A. Herbert. Crd.

**PROGRAM OF
ANNUAL CONVENTION
WAINWRIGHT U. F. A.
AND U. F. W. A. ASSO.**
